## Van Size Overview

### 2. Medium Van (Long Wheelbase Transit)

- **Capacity:** Approximately 800-1,000 cubic feet  
Ideal For: Two-bedroom homes or small families.
- Perfect for moving medium-sized loads, such as furniture and appliances.

### 3. Large Van (Luton with Tail Lift)

- **Capacity:** Approximately 1,200-1,500 cubic feet  
Ideal For: Larger family homes, three-bedroom houses, or multiple-room moves. Excellent for extensive belongings, including larger furniture items.

## Packing Tips for a Successful Move

Efficient packing can streamline your move. Here are key tips:

- **Declutter:** Sort items into 'keep,' 'donate,' and 'discard' categories to lighten your load.
- **Use Quality Materials:** Invest in sturdy boxes, bubble wrap, and strong tape to protect your belongings.
- **Label Boxes:** Clearly mark each box with its contents and destination room for easy unpacking.
- **Pack Smartly:** Place heavier items at the bottom and fill empty spaces with soft items to prevent shifting.
- **Fill Empty Spaces:** Use soft items like towels or clothes to cushion and stabilize your packed boxes.
- **Take Inventory:** Keep a detailed list of your packed items to ensure nothing gets lost during the move.

## Factors to Consider When Choosing a Van

### Volume of Belongings

Take stock of your items. Make a list of large furniture pieces, boxes, and appliances. If you have a lot to move, a larger van will save you from multiple trips.

### Access and Parking

Check the parking situation at both your current and new addresses. If your street has restrictions for larger vehicles, a smaller van might be more practical. Always consider the space needed for loading and unloading.

### Fragility of Items

Delicate items such as glassware, artwork, and electronics may require extra care. Ensure you have sufficient space to transport these safely, as cramming them in with other items could lead to damage.

### Distance of Move

Longer distances may require more careful packing to prevent items from shifting. Consider this when deciding on the size and type of van.

### Number of Helpers

If you're moving with a few friends or family members, a larger van may be manageable. However, if you're going solo, a smaller van could be more practical and easier to handle.
